***Drawings***

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the door must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

The drawings are objected to because in Fig. 4, walls 32 should be 32a,32b.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this

Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 4, 7, 8, 10, 13, 14, 15, 17 and 20 are rejected under 35

U.S.C. 102(b) as being anticipated by Hess. Hess teaches screening members (30,17) with removable shelves (24). The screening members enclose an area. The back member/screening member (30) is planar and easily removable. The other screening members are also removable. Furthermore, a door (20) is provided in front of the shelves. Since Hess teaches all of the limitations of the claims, the method steps would inherently also be provided for.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3637

Claims 3, 6, 9, 12, 16 and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hess. As stated above, Hess teaches the limitations of claims 1, 7, and 13, including a back screening member (which is metal) and shelves attached to two other screening members (the vertical sides of frame 17). For claims 3, 9 and 16, Hess fails to teach that the screening member is drywall. The examiner takes Official notice that drywall sheets are well known in the art. Therefore, it would have been obvious to one having ordinary skill in the art at the time of the invention to modify the back screening member of Hess by constructing it out of drywall, for aesthetic reasons.

For claims 6, 12, and 19, Hess fails to teach that the shelves are attached to the screening members via friction fitting. The examiner takes Official notice that attaching horizontal members to vertical members via friction fitting is well known in the art. Therefore, it would have been obvious to one having ordinary skill in the art at the time of the invention to attach the shelves to the frame of Hess via an alternate means, i.e. using friction fitting instead of the ledges presently used, since these means are functional equivalents and it appears that either means would work equally well for attaching the shelves to the frame. Furthermore, the friction fitting attachment would simplify assembly since no ledges would be required.

***Allowable Subject Matter***

Art Unit: 3637

Claims 5, 11 and 18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Janet M. Wilkens whose telephone number is (571) 272-6869. The examiner can normally be reached on Monday-Thursday.
